In set theory as Cantor defined
and Zermelo and Fraenkel
axiomatized, an object is either a
member of a set or not. In fuzzy
set theory this condition was
relaxed by Lotfi A. Zadeh so an
object has a degree of
membership in a set, a number
between 0 and 1. za, 17 mrt 2018

Einstein's work on quantum

to information philosophy,
because we depend on a limited

indeterminism and an "adequate"
or statistical determinism to
explain the possibilities in an
open future needed to create new
information. Albert Einstein -
